

International Petroleum Technology Conference (IPTC). Conference will take place on the 20th - 22th of January 2016 in Doha, Qatar.

CALL FOR PAPERS IS NOW CLOSED

The International Petroleum Technology Conference (IPTC) is an annual event rotating between Asia Pacific and the Middle East. The scope of the conference program and associated industry activities address technology and relevant industry issues that challenge industry professionals and management around the world.

The Conference Program will be focused on dissemination of new and current technology, best practices and multi-disciplinary activities designed to emphasize the importance of the “value chain” and maximizing asset value. The knowledge, capabilities and strengths of the participating countries and the sponsoring societies’ global membership, over the spectrum of multi-disciplinary technologies, will be central to the success of the conference and the corresponding exhibition.

Regional oil ministers, industry leaders and governmental representatives will have an opportunity to discuss and share their views on timely industry topics and trends, exchange expertise and experience, present state-of-the-art technology and innovation, and to stimulate further research of technical and business activities. In addition, awards and recognition will be given for organizations’ efforts in technical and business contributions to the industry. There will also be a range of integrated social activities to encourage networking and off-line discussion.
