

The European Arab Engineers Union (EAEU) has proven to be an important address in the connection between Europe and Arab countries. EAEU has sound bridges between Arab /European engineering and scientific organizations that opens to our members direct access to a personal network of short distances. With our Union European Engineers and companies have a professional partner which paves the way to the Arab market and organizations. We are also active in generating introductions and referrals for member Engineers and companies to help encourage member-to-member cooperation as well as promoting member services and products to the wider Engineering community.

Main goals of our union are information communication and networking. Therefore EAEU serves its members and the wider Arab and European communities by offering the following services:

### **Networking:**

- Professional assistance in forging personal contact.
- Support with initiation of cooperation ties and searching for adequate scientific partners.
- Regular organization of delegation trips for Engineers on both sides are organized to establish and to extend their contacts.
- Participation in Engineering conferences and fairs in the Arab world, in Europe and world-wide.
- The EAEU has created a contact group at [www.xing.com](http://www.xing.com) (EAEU European Arabic Engineers Union)

### **Engineering Consulting:**

- **Consulting:** The experts of EAEU can help our members in all engineering fields. They can give you in high-tech topics and projects very gut and first class consulting, studies and technical information's.
- **Experience:** The EAEU offers its experience to European and Arabic members in the field of science and technology.
- **Project Partners:** The EAEU can be a good Partner for you in all sectors of engineering and economy. They are also prepared to work in the Arab countries.

### Mediation:

- Mediation and arbitration in cases of disputes between European and Arab engineers, businessmen and companies.

### Information:

- **Newsletter:** Regular newsletter with reports on the latest Engineering topics and projects.
- **Website:** the website [www.eaeu.org](http://www.eaeu.org) provides extensive Technical and scientific data in English and Arabic.
- **Contact:** The EAEU can provide information's and necessary contacts to engineers or companies that are interested to expand their cooperation and business into Europe or Arab counties.
- **Tender:** Publication of invitations to tender from all Arab countries.

### Training programs:

- science and technology training seminars
- Business and economy training seminars
- Cultural and legal training seminars
- Multiplicity of events and seminars on different themes

### Education & Universities:

- **Registration at universities:** The EAEU can help Arab Student and engineers to register at European universities for studies, research and Ph.D.
